

## Job Description

**Job Title: Web Developer**

**Location: Office Based**

**Department: Development**

**Position Reports To: Development Team Lead**

### Company Overview

Gigaclear is a high growth company delivering fibre-optic broadband to underserved rural communities in England. Started in 2010, the company is expanding rapidly across England. With head offices based in Abingdon, Oxfordshire and a significant proportion of staff based in the field Gigaclear currently has over 300 employees and is pursuing ambitious growth plans.

Gigaclear is a fast growing, game changing builder and provider of pure fibre broadband services to residential customers and businesses in England. We have an ambition to make a significant difference to the broadband landscape in rural England and improve our customers lives through the provision of world class broadband services.

The core aim of the Development Team is to provide departments across the business with the software they need to work as effectively as possible. This means innovation, automating manual tasks or exploiting cutting edge technology to deliver value back to the business like the Lidar vehicle we have harvesting 3D geospatial data around the country or the use of AWS Cloud infrastructure to deploy our projects.

### Purpose of the job

As a Web Developer, you will work closely with the Creative team, and the Technology Teams, owning the deployment, operation and support of our Web applications, including our Website, ensuring the availability, performance, scalability and security of the applications. This role is a technical role with high degree of business user interaction. You will need to be able to communicate with and engage with users of varying levels of technical proficiency. We will support you in fulfilling your potential and you will benefit from training and development from our experienced and expert engineers.

### Key Accountability & Responsibilities

- Hands on development, ensuring completeness against the Acceptance Criteria and the design intent
- Work together with other developers/creatives and Stakeholders to refine User Stories and Acceptance Criteria
- Ensure quality, security and timeliness of the developed applications
- Be able to work in an Agile/Scrum environment, on multiple projects at the same time

### Knowledge & Skills

- Required
  - Ability to develop Web Applications using HTML/CSS/Javascript/JQuery
  - Experience with PHP
  - Experienced in implementing Drupal CMS
  - Knowledgeable with Google Analytics
  - Knowledge about App Development (both Android and iOS)
  - Security focused and problem solver
  - Passionate about building and maintaining Web Applications
  - Continuous improvement of processes and practices
  - Ability to collaborate and communicate with others
- Nice to have
  - Python Knowledge
  - REST/Salesforce API Integration experience
  - Experience using Git as version control
  - Website debugging skills using debug tools like Chrome Inspector
  - Understanding of SEO Strategies
  - Knowledge about deployment in AWS

## **Qualifications & Accreditations**

Degree level of education or equivalent experience.

## **Our Values**

**Find a way** - we will work together to deliver market-leading solutions and provide customer service excellence to our communities

**Do the right thing** - we always base our decisions on what we believe is fair, considerate and in the best interest of our customers and our colleagues

**Be committed** - we are all accountable for our actions and work relentlessly with our many customers to deliver on our promises

**Keep it simple** - we take potentially complex and confusing information and we make it easy for everyone to understand

*This job description is not intended to be exhaustive. The post holder will be expected to adopt a flexible attitude to the duties which may be varied (after discussion), subject to the needs of the business and in keeping with the general profile of the role.*
